## Biography

I am a multidisciplinary data manager and analyst with over 15 years experience at seven Australian universities and the CSIRO, especially the ANU. I am currently a Data Scientist at the University of Canberra Health Research Institute. I am about to submit my PhD at the ANU. Until 2013 I worked closely with Tony McMichael's Climate Change and Health programme at ANU. In 2014/15 I led the development of the data portal for the Long Term Ecological Research Network. I work on data analysis that disentangles health effects of environmental changes from social factors. I give special attention to issues of data management, security, privacy and ethics, with my research into climate and mental health as a key motivating use-case.

I have primarily worked in environmental epidemiology, building on the systems approach I gained from my undergraduate training in human ecology at ANU. My PhD research focused on reproducible research pipelines, integration of heterogeneous datasets and statistical modelling of exposure-response associations in the context of complex multifactorial causality. My studies include phenomena such as the effects of drought and extreme heat on mental health. The conceptual framework I used for integrating these data incorporates the idea of five interacting 'capitals' and I explored the areas of differential vulnerability across sub-populations, precision of spatio-temporal exposure estimates and general issues of geospatial data analysis methods.

I have been both lead author and contributing author on 22 peer-reviewed journal papers. I have contributed to 6 reports and 14 conference presentations. My Scopus h-index is 11. My contributions have spanned the range from designing study protocols, creating datasets, conducting analyses and communicating results. The integration of gridded, point-source and area-based administrative data has become a specialty. In particular I have experience in the integration of health, social and environmental data which involves reconciling health and socio-economic or population data based on incompatible spatial units. I also am adept at the creation of linked environmental exposure maps and computer programming. Alongside my experience in analysis of empirical data I have experience in scenario-based forecasting in climate change risk assessments.

## Appointments

### University of Canberra

2016--Present. Research Fellow Data Scientist, Centre for Research and Action in Public Health.

### University of Sydney

2015--2016. Data Manager/Analyst, University Centre of Rural Health.

### University of Queensland

2015 (May-June). Senior Scientific Workflow Developer, Terrestrial Ecosystem Research Network.

### Australian National University

2013--2015. Data Portal Project Manager and Analyst, Fenner School of Environment and Society. Long-Term Ecosystem Research Network and Australian Supersite Network. 2008--2013. Data Manager/Analyst, National Centre for Epidemiology and Population Health (NCEPH). 2001--2005, 2008--2009. Data Analyst, Climate and Health (NCEPH).

### CSIRO Adaptive Primary Industries

2013. Part-time data analysis projects investigating transformational adaptation in Energy and Farming.

### James Cook University

2013--2015. Part-time Research Data Scientist assisting the Terrestrial Ecosystem Research Network's Australian Supersite Network online data portal and Analytical software developments.

**University of Tasmania**

2008--2011. Data Manager and Analyst, Bushfire Smoke, Heatwaves and Health Project,  
School of Plant Science.

**Charles Darwin University**

2006--2007. Data Manager and Analyst, Bushfire Smoke and Health Project,  
School of Environmental Research.

**Education****Australian National University**

2009--Present: Part-time PhD entitled *Disentangling Health Effects of Environmental Change from Social Factors*, NCEPH and CSIRO. Panel: Colin Butler, Philip Kokic, Rohan Nelson, Steven McEachern, Kathryn Glass.

1998-2005: Bachelor of Arts in Geography and Human Ecology, First Class Honours in Environmental Epidemiology, School of Resources, Environment and Society. ANU.

**Papers**

Citation numbers were retrieved from google scholar on 15-Jul-2015 . Journal Impact Factors were accessed in July 2015.

- International Journal of Environmental Research and Public Health, 2015 (blind review - accepted).
- Australian Institute of Health and Welfare, 2016 (confidential review of draft report).

## Programming expertise

- I have extensive skills with the R language for statistical computing and graphics.
- I contribute to several R packages and open source code project sites via my GitHub pages (<https://github.com/ivanhanigan>):
- I also have experience with Statistical tools in Splus, Stata, Kepler-project and SPSS.
- I am adept at generic programming and configuring Postgres, PostGIS, Geoserver, QGIS, ArcGIS, Oracle-XE, Linux (Ubuntu, Centos, RHEL).

## Technical courses

- Satellite Data for Air Pollution Exposure Assessment, Centre for Air Quality and Health Research, 24th September 2015, Woolcock Institute.
- Secure Unified Research Environment Certification, 10 June 2015. Sax Institute, Sydney NSW.
- Optimize and Tune Your PostgreSQL Database Server Performance, 13 Mar 2013. EnterpriseDB <http://www.enterprisedb.com>.
- Computing for Data Analysis, 24 Sep - 27 Oct 2012. Prof Roger Peng Johns Hopkins Bloomberg School of Public Health, Coursera.
- Bayesian Hierarchical Modelling of Spatial and Temporal Data, 21-23 November 2011, CSIRO/ANU, Canberra, ACT.
- Statistical Data and Metadata eXchange (SDMX) standard and tools. 24 March 2010, Australian Bureau of Statistics.
- Australian Weather and Society Integrated Studies Workshop. 29th – 2nd February 2007. Emergency Management Australia, Mount Macedon, VIC.
- Spatial Analysis in Environmental and Social Epidemiology. 5th - 8th September 2005. The Australian National University, Canberra.
- Formatting long documents in Microsoft Word, 2004, The Australian National University Information Literacy.
- Endnote Referencing Software training, 2004, The Australian National University Information Literacy.
- Air Pollution Exposure: measurement, modelling and assessment. 2nd - 3rd December 2004, The Australian National University, Canberra.
- Climate Change and Health: Research Methods and Policy Issues. 29th September – 2nd October 2003, The Australian National University, Canberra.

## Contribution to Teaching and Learning

- Marking masters of environmental health assignments, University of Sydney, Semester 2 2015.
- I give occasional guest lectures in spatial epidemiology to geography students at ANU.
- I have sat on several selection panels for job interviews both at a number of Centres at the ANU.
- I gave training in programming, data analysis and data management for staff and students at ANU.
- I was one of the founding members of the ANU GIS Forum in 2009.
- I contribute to ANU wide data management meetings with the Australian Data Archives and the National Supercomputer facility.

## Grants

- 2012, A Scientific Workflow System for Assessing and Projecting the Health Impacts of Extreme Weather Events. Australian National Data Service Applications project. PI Keith Dear, ANU.
- 2011, Dengue Transmission under Climate Change in Northern Australia: Linking Ecological and Population Data. NH&MRC. PI David Harley, ANU.
- 2010, Suicide and Drought: Understanding Human Impacts of Environmental Change. CSIRO PhD Scholarship top-up. PI Ivan Hanigan, ANU.
- 2010, Climate Change and Rural Communities: Integrated study of physical and social impacts, health risks and adaptive options. NH&MRC. PI Anthony McMichael, ANU.
- 2009, I was named as Professional Staff on Understanding the Health Effects of Landscape Burning and Biomass Smoke. ARC. PI Prof David Bowman UTAS.
- 2005, Health Forecasting System, NSW Health. PI Rennie D'Souza, ANU.

## Awards

- Honorable mention by NatStats 2013 Conference Awards judging panel (Brisbane Aust. March 2013):
- Nov 2012 Bhati Family India Travel Grant.
- Oct 2012 Runner Up, Australian National Data Service eResearch tools for the National Cloud competition.
